David,

As we've explained many times from Fillmore Field Office, we are not the entity to whom you need to address the common-uncommon variety issue and whether the material is a "gemstone." You will need to submit your information for a mineral validity examination and possibly later to the Interior Board of Land Appeals (IBLA).

I will be happy to examine a Plan of Operations for completeness and assist with other possibilities such as collection of bulk samples for testing. However, I'm not authorized to determine if the material is a "gemstone." Others such as a mineral examiner and the IBLA will be needed for that determination.

I will determine if the proposed Plan of Operations is complete to BLM standards within 30 days. Have a wonderful holiday season!

Best wishes always,

Duane Bays

Dear Duane

Please see world book Encyclopedia on gems as far back as 1979. Or Wikipedia on the Internet the worlds free encyclopedia under gemstones

Best wishes

David Penney

Hello,

I've received your new Plan of Operations proposal for UTU-86062. Please refer to this number in future correspondence. As Federal regulations require, I will inform you within 30 days if your proposed Plan of Operations is complete.

There remains a common-uncommon variety issue at this site, as you probably know. That is a

separate issue from Plan completeness. I will refer that issue to other BLM specialists.

Best wishes,
